

patient information at your fingertips

## eDischarge™

Providing accurate, consistent and timely clinical information to GPs at the point of patient discharge.

Evolve eDischarge, from Kainos, **allows a Trust to submit electronic discharge summaries directly to GPs as soon as a patient leaves hospital.** The solution, part of an integrated suite of applications transforming document management and workflow within Trusts, aids compliance with the Department of Health's 24 hour discharge target, **improves efficiency and raises the quality of care** by facilitating the smooth transfer of care between acute and primary providers.

### AT A GLANCE

Evolve eDischarge means:

- **Electronic capture of key clinical information**  
eg diagnoses, co-morbidities, investigation and results, procedures and treatments, medications and any follow-up arrangements
- **Accurate medication**  
Medication details are recorded and tracked while an approved discharge summary can be issued to pharmacy to allow medication to be dispensed reliably and efficiently
- **Improved coding**  
Depth and accuracy of episode coding is improved by the timely availability of an accurate legible and auditable discharge
- **Compliance**  
Trusts are able to meet strict new requirements for transmitting discharge summaries to GPs within 24 hours
- **A more joined-up service**  
Seamless, automatic transmission of patient details between acute and primary care, via a choice of media including NHS mail or XML message direct to GPs' own system
- **Better patient care**  
via a smooth, rapid and reliable handover of full discharge notes that are clearly coded and not handwritten
- **Greater efficiency at lower cost**  
Time spent by clinicians on patient administration is reduced, enabling them to focus on patient care
- **Integration with existing and future Trust systems**  
Full integration with Patient Administration Systems is supported, as well as those used for pharmacy management, etc

# The Kainos healthcare portfolio

Evolve, developed in conjunction with NHS clinicians and managers, is the flagship solution in Kainos's comprehensive suite of healthcare solutions, which cost-effectively automate the creation, capture, handling and transmission of critical medical casenotes and operational documents and records.

Evolve, from Kainos, is a range of solutions that enables Trusts to eradicate costly administrative operations, improve information accuracy and access, meet Government performance targets, increase clinical safety and improve the quality of patient care.

## Our key differentiators include:

- A flexible and tailored approach - matching proven solutions to your individual needs
- Our solution is modular and is designed to maximise the value of your existing investments not replace them
- Our close engagement with the clinical community
- The desire and experience to get you up and running quickly, delivering early wins and efficiency gains
- A partnership approach that is pragmatic, disciplined and iterative
- A product suite able to deliver added value at every stage in a Trust's migration to a full electronic patient record (EPR)
